

Set Up Guide – DX8000

Ingenico DX8000

Here's what we've sent you:

DX8000 Handset

Charging Base

Power Supply Unit

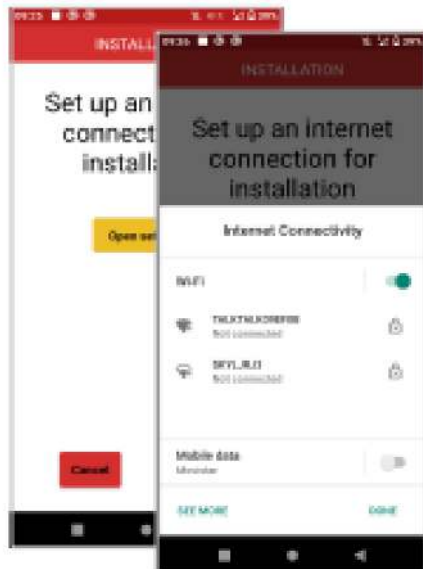

Before completing the payments setup, please connect your DX8000 to power (we recommend 4 hrs of charge before use). Press and hold the power button (on the left- hand side) to power on.

Have your **Worldpay customer number**(aka **MID or merchant number**) at hand. You'll find this in a recent email from us with the subject line: 'Your Worldpay terminal is on its way'.

1 Select **Open Settings** to get started

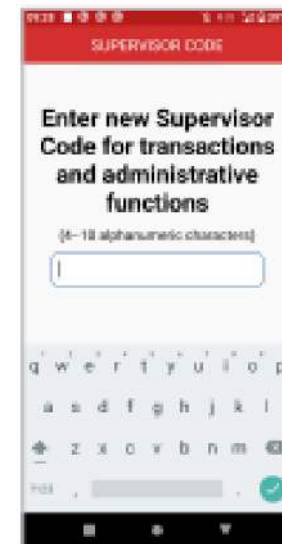

Your capital DX8000's mobile connection is already enabled. We recommend using wi-fi wherever possible for dual connectivity.

2 Type in your **Worldpay** customer number

Type in your 8-digit merchant number, also known as Worldpay customer number.

3 Create your **supervisor code**

You'll use this code for admin tasks like refunds and opening android settings. It's important to keep it secure. The app will close to save these settings. Re-open it to start taking payments!

Congratulations.

Now you can start taking card payments!

- To start a sale, enter the amount and follow the instructions. You can choose from other transaction types by selecting their icon at the top of the screen.
- You can switch between Cardholder Present/Not Present by pressing the three dots in the top right corner.

Online Support

Our online help centre contains videos, articles, set-up guidance and troubleshooting.
